Q: Java outofmemory exception I have an error in my program which is Exception in thread "main"

main method 70,71,72. I cant understand why it is showing this error and how to solve it. Can anyone help me with
this? A: I would think that it's because of your ArrayLists being so large. It's probably not even the arraylists that are
causing the error, it's just that the java compiler uses more memory when it generates byte code for arraylists. FILED
